On June 17, the Greater Los Angeles New Car Dealers Association hosted its annual dealer member luncheon at the Universal Sheraton in Universal City. There were over 225 guests from throughout the automotive industry in attendance which took place in the Starview Room on the top floor of the property.

The keynote speaker for the event was Mark Owen, the author of the *New York Times* Bestseller, “No Easy Day”. Mark shared with the audience intimate details of some very high profile military operations he participated in. These included the Captain Phillips rescue off the coast of Somalia, and the mission that resulted in the death of Osama Bin Laden in Pakistan. In addition, Mark had some very inspiring and motivational thoughts as it related to his Navy SEAL Training, and SEAL Team Six experiences.

GLANCDA President Ian Thomas, presided as the Master of Ceremonies for the event. Among those recognized for their support in the National Automotive Technician competition were Galpin Motors, Keyes Automotive Group, and Longo Toyota. The GLANCDA sponsored team from Van Nuys High School (Joe Agruso, Sonny Salas, and Armando Rodriguez) who were also in attendance with their families.

GLANCDA also presented a check to Wade Trimmer of the San Fernando Valley Rescue Mission to assist in the rebuilding effort following a devastating fire in April.

The Pasadena Educational Foundation (PEF) is proud to announce that together with the Greater Los Angeles New Car Dealers Association (GLANCDA) and the Symes Automotive Group have donated $5,000 to assist PEF in supporting the students and teachers of the Pasadena Unified School District (PUSD).

Through the support of individuals and corporate partners throughout the community, PEF supports, enhances, and supplements the programs, initiatives, and priorities of the PUSD. “Every day we are privileged to see the innovation, inspiration, and the promise of a better future that the support of our community partners makes possible,” said Patrick Conyers, PEF Executive Director. “We are grateful to the Board of Directors of the GLANCDA and to their individuals, partners, and corporate members for their support of PEF and the public schools of Altadena, Pasadena, and Sierra Madre.”

Pasadena Educational Foundation is a nonprofit organization that advocates for public education, engages the community, and develops resources to support excellent education for every Pasadena Unified School District student. Whether it be through the arts, music, health centers, gardens, or STEM programs they support, PEF is dedicated to creating a better future for the public school students of Altadena, Pasadena, and Sierra Madre.

Does the latest recall news have you wondering whether many of the automobiles driving on U.S. streets and highways are dangerous? It seems like there’s a news report about recalls almost daily – almost 20 announced so far this month.

In fact, automobiles are safer today than they have ever been. And the newer the vehicle, the safer it is – whether there’s been a recall notice on it or not. That is not a contradiction because behind the many recalls there are several different dynamics at work, including advanced technology and engineering, automobile manufacturing methods, politics, and the 24-hour news cycle. They all converge in this latest wave of recalls.

The average age of automobiles in the United States is about 11 years, so consumers who have been waiting for improvement in the economy – and their own personal finances – are beginning to think about buying new cars. Not surprisingly, they want their new cars to be the most technologically advanced possible, and include every bell and whistle they can afford, because they will probably hang on to that car for several years. After all, a new car is barely broken in at 100,000 miles.

This demand for highly advanced machines means there’s a lot more in those automobiles that can go wrong. Manufacturers are constantly testing their technology and when they find there’s a problem, especially a safety problem, they voluntarily recall the affected vehicles without any prompting from the government. If the government has to intervene it can result in big fines to the manufacturers, so they’re becoming even more vigilant about ferreting out any potential safety concerns.

As the technology becomes more complex, and more expensive to research and develop, automakers are finding ways to use the same technology in several models, thereby keeping consumer prices lower. But this also means that if a safety issue is found in one model it may necessitate recalling all of the models in which that technology is used, driving up the number of recalled vehicles.

Politics plays a role in recalls, too. The National Highway Traffic Safety Administration or NHTSA, the federal agency responsible for setting national motor vehicle safety standards, has been under more scrutiny by Congress and the motoring public. Consequently, NHTSA has become very aggressive when it comes to investigating complaints. A case in point is a recent investigation initiated on 2014 Chevrolet Impalas for a fuel-line problem after a single consumer inquiry.

Of course, the government should be very careful where human safety is involved. But this necessarily will result in a higher number of recalls and more news about recalls than ever.

News about recalls, while providing an important public service, also serves to magnify the impact of recalls. Reporting has gone from a daily newspaper and single newscast to a 24-hour news cycle with huge competition to make every story more detailed and more interesting. What once might have been a matter-of-fact announcement of a vehicle recall now is repeated many times and advanced with video, multiple interviews, reporter talkbacks and snappy graphics.

One upside is that consumers are more conscious than ever of safety. It provides us in the automotive industry the opportunity to highlight the ever-increasing number of safety features that new vehicles have. For example, in the last few years vehicles have added anti-lock brakes, more air bags, collision and lane departure warning, adaptive headlights and many more features. Cars don’t drive themselves – though that’s in the works, too – but they certainly help protect their drivers in more ways than ever before, and accident rates have dropped consistently as a result.

Safety recalls aside, since driver error is the biggest vehicle safety issue, we all must continue to focus on driving as carefully as possible, on avoiding distracted driving or driving while intoxicated, on getting enough rest before driving, and on always wearing safety belts.

About GLANCDA

Originally founded in 1907, the Greater Los Angeles New Car Dealers Association provides valuable educational and philanthropic benefits to the Los Angeles Community.

The Association believes that involvement with local charitable organizations makes a positive difference for everyone involved.

Who we are... We are factory-franchised dealers who are committed to serving the communities of Greater Los Angeles County by promoting professionalism within the retail automotive industry. The Association dealer members contribute not only to the economy of Los Angeles County, but also to the well-being and growth of their individual communities.

Who our members are... Our Members are individuals, partnerships, or corporations owning and operating a franchised motor vehicle dealership engaged in the sales of automobiles or trucks and licensed by the State of California and located within the Los Angeles County area.

For more information, please visit the website at www.glancda.org.

Member Benefits

Los Angeles Auto Show Ticket Package only available to each GLANCDA Dealer Member per Dealership. GLANCDA is the exclusive automobile dealer association endorser of the Show, which helps boost local member sales and reinforces Greater Los Angeles as a hub of automotive design and consumer trends. This ticket offer is only good for current GLANCDA members, and New Members in good standing.

Regular communication with legislators and government officials dealing with local, state, and federal issues which protects the dealer franchise system and promotes the business interests of our members.

Auto Outlook New Vehicle Sales Data sent to members via our e-newsletter, quarterly magazine, and hosted on our website, with forecast and analysis of new retail light vehicle market, analysis of forecast determinants, comparison with National market, nameplate sales performance, and coverage of vehicle sales in market segment.

Quarterly publication of LA Dealer magazine sent to members.

Special discounts to attend informative seminars with some of the industry’s leading speakers.

Special partnership with T.R.A.P. (Taskforce for Regional Auto Theft Prevention) which helps members reduces dealership theft and fraud.

Special discount rate to VIP area of Sneak Preview Night at the L.A. Auto Show. We are the exclusive automobile dealer association endorser of the Show, which helps boost local member sales and reinforces Greater Los Angeles as a hub of automotive design and consumer trends.

Early Warning System - We monitor the state and federal courts in Los Angeles County to alert members when a lawsuit has been filed against them.

Technology Contest for High School seniors to encourage young people to get involved and pursue careers in the auto industry.

Community Service - we are leaders in contributing to worthy community programs in Los Angeles County which promotes the image of new car dealers with the public.

Regular email newsletter to members.

Email alerts to our members when there is important information for them, or when immediate action is necessary.

Collaboration with the California New Car Dealers State Association regarding seminars and legislative and regulatory matters.

Special discounts to attend the CNCDA Annual Dealer Day in Sacramento to meet with state legislators and educate them on dealer issues.

The GLANCDA website which is at www.glancda.org.

Annual luncheon and business meeting of members with a prominent keynote speaker.

Opportunity to serve on GLANCDA Board of Directors.
Los Angeles Auto Outlook™
Comprehensive information on the LA County new vehicle market

Quick Facts
Los Angeles County new vehicle registrations increased 12% in April ’14 vs. ’13.

New registrations in the county increased 9.7% during the first four months of this year, compared to a year earlier.

The three month moving average of new vehicle registrations increased for the 27th consecutive month in April of this year.

Japanese brand share increased from 50% during the first four months of 2013 to 51.5% this year.

Data measures new vehicle registrations in the county. Monthly recording of registrations occurs when the data is processed by the DMV.

% Change in Three Month Moving Average of New Retail Registrations vs. Year Earlier

The graph above provides a clear picture of the trending direction of the LA County market. It shows the year-over-year percent change in the three month moving average of new retail light vehicle registrations. The three month moving average is less erratic than monthly registrations, which can fluctuate due to such factors as the timing of manufacturer incentive programs, weather and title processing delays by governmental agencies.

Data Information
All data represents new and used vehicle retail registrations in Los Angeles County and excludes fleet. Please keep in mind that monthly registration figures can occasionally be subject to fluctuations, resulting in over or under estimation of actual results. This usually occurs due to processing delays by governmental agencies. For this reason, the year-to-date figures will typically be more reflective of market results. Green shaded areas in tables represent the top ten ranked brands. Data Source: AutoCount data from Experian Automotive.
